CS 301R · ESTIMATION AND SEQUENCING WORKSHOP

Fit Check Sheet

Name _____

Project _____

1 · The sizes *relative first, hours second*

XS	**< 1 hour**	A label, a typo, a config line
S	**≈ 2 hours**	One focused sitting
M	**≈ 4 hours**	Two or three sittings; about half a week of one person's time
L	**≈ 7 hours**	A whole week of one person's time. **Split it, or schedule it first.**
XL	**> a week**	An epic. **Split it now.**

Our anchor, a finished piece of work everyone knows, called **S**:

_____

2 · The budget *the hours that actually exist*

People ____ × hours a week ____ × weeks ____

= ____ − review and slack ____ = **budget** ____

In this course: about 7 outside hours a week each, and about 2 weeks to the progress demo. Solo, that's 14 before review. Count review: every change goes through a pull request.

3 · Size the first milestone *size silently, reveal together, talk only about the disagreements · solo: trade sheets with your review partner*

ISSUE (SHORT TITLE)	MINE	THEIRS	AGREED	≈ HRS	SLICE?	NEEDS

Total ____ **against a budget of** ____

It: ☐ fits, with room to spare ☐ fits on paper, which means it doesn't ☐ doesn't fit

4 · Where we disagreed *what did each of us picture?*

Issue, and the two pictures:

_____

_____

What the issue's acceptance criteria now say, so the next reader can't picture it wrong:

_____

5 · The cut *try these in order*

1. **Off the slice first.** Move what the demo doesn't walk to the next milestone.
2. **Take a fallback.** A simpler way to build the same thing.
3. **Shrink the acceptance criteria.** Less of it, still working.
4. **Defer to the roadmap,** written down, with no date.

What we cut, and the new total:

_____

Our next cut, if the midpoint check shows us behind:

_____

6 · The slice statement *goes in the first milestone's description: specific enough to rehearse*

On the progress demo, we will demo:

who _____

does _____

and sees _____

Then put it on the board: sizes in the Size field, the slice issues labeled **slice**, Ready in order, this sentence on the first milestone.

Keep this sheet; it's your working copy.
