CS 301R · DRY RUN

Dry-Run Score Sheet

Project _____

Play the outside audience: a classmate, and a skeptical faculty member who has never seen this project. For each question, mark whether it landed, then give one specific moment each way. "Good job" helps no one; "the double-booking refusal sold it" does. Feedback, not a grade.

THE QUESTION	DID IT LAND?	THE MOMENT THAT SOLD IT	THE MOMENT I DOUBTED
1 What need does this serve? *A real user, and evidence the need is real*	☐ yes ☐ partly ☐ no		
2 What has been built? *Claim first, then proven live, not just shown*	☐ yes ☐ partly ☐ no		
3 Where next, and how can others join? *Next steps I'd believe, and a way in shown*	☐ yes ☐ partly ☐ no		

Time (9 minutes, hard): ended at ____ min
☐ inside ☐ over ☐ rushed the end

Demo mechanics (check what was ready):
☐ logged in ☐ data loaded ☐ windows set up ☐ readable from the back ☐ fallback ready

Q&A: the hardest question asked was answered ☐ straight ☐ with a hedge ☐ in a way the demo or the retrospective contradicts

One thing to keep: _____

One thing to fix before the tag: _____

Say your keep and your fix out loud, then hand the sheet to the presenter. Presenters: these become your polish plan.
