Dry-Run Scoring Sheet

One row per project, in run order · practice levels against CP12, not entered in Canvas

CP12 CRITERION	WT	4 · EXEMPLARY	3 · PROFICIENT	2 · DEVELOPING	1 · BEGINNING
Need (Q1)	**20**	Specific user, vivid need; evidence from discovery and from users · 20	Clear need with evidence; mostly discovery, or thin · 15	Stated but vague, or asserted · 10	No recognizable user or need · 5
Built: live demo (Q2)	**25**	Claim first; slice walked live, smoothly; limits named; trouble met with a fallback · 25	Works live with hiccups or a loose frame; or a declared clip run calmly (cap) · 18.75	Shaky or partial; unframed; a failure with no fallback · 12.5	No working demo · 6.25
Next & join (Q3)	**20**	Believable next steps; the on-ramp shown in the repo; claims only what the code supports · 20	Clear next steps and a way to join, a little general · 15	Thin, or a wish list off the roadmap · 10	Missing, or promises the code can't keep · 5
Integration (story)	**15**	One story: discovery visibly shaped what was built and what's next · 15	Mostly coherent; a stage loosely tied · 11.25	Stages as separate reports · 7.5	No through-line · 3.75
Delivery	**10**	Clear, persuasive, well paced, inside 9 minutes · 10	Solid; a rough patch or a little over · 7.5	Uneven, or well over time · 5	Unprepared · 2.5
Q&A	**10**	Direct and honest, incl. "we don't know yet"; agrees with retro and repo · 10	One answer vague or evasive · 7.5	Deflects, or contradicts the retrospective · 5	Can't engage · 2.5

		PRACTICE LEVELS, LIVE						WHAT HAPPENED			
#	PROJECT · TIME SPLITS	NEED 20%	DEMO 25%	NEXT & JOIN 20%	STORY 15%	DELIVERY 10%	Q&A 10%	MECHANICS	THE DEMO	MY QUESTION	NOTES · THEIR TOP FIX
1	need ___ · demo ___ · next ___ ended at ____ min							☐ logged in ☐ data ☐ windows ☐ readable ☐ fallback ready	☐ clean ☐ fallback run ☐ declared clip ☐ restarted / narrated	bank Q# ____ ☐ straight ☐ hedge ☐ contradicts retro/repo	
2	need ___ · demo ___ · next ___ ended at ____ min							☐ logged in ☐ data ☐ windows ☐ readable ☐ fallback ready	☐ clean ☐ fallback run ☐ declared clip ☐ restarted / narrated	bank Q# ____ ☐ straight ☐ hedge ☐ contradicts retro/repo	
3	need ___ · demo ___ · next ___ ended at ____ min							☐ logged in ☐ data ☐ windows ☐ readable ☐ fallback ready	☐ clean ☐ fallback run ☐ declared clip ☐ restarted / narrated	bank Q# ____ ☐ straight ☐ hedge ☐ contradicts retro/repo	
4	need ___ · demo ___ · next ___ ended at ____ min							☐ logged in ☐ data ☐ windows ☐ readable ☐ fallback ready	☐ clean ☐ fallback run ☐ declared clip ☐ restarted / narrated	bank Q# ____ ☐ straight ☐ hedge ☐ contradicts retro/repo	

Boxes take a practice level, 4–1. The dry run isn't graded: the levels show each presenter where they stand against CP12 and tell you whom to visit in Wednesday's studio. **Splits** from your stopwatch at the need → demo → next transitions; the clock stops at 9. **Mechanics** is what was ready before they began. **My question** is the one you asked from the question bank, and how it was answered. **Top fix** is what they said aloud in the debrief; check it on Wednesday.
