CS 301R · PROGRESS DEMOS

Demo Feedback

Project demoed _____

Feedback for the presenter, not their grade, and anonymous. Fill it in during the demo and the questions. The test for every answer: did the demo **prove** it, or only **show** it? Be specific and kind, and hand the sheet to the presenter when their questions end.

1 · The claim · What did the demo set out to prove? *In your words; "nothing stated" is an answer*

2 · Proof · Was it proven? *If the claim were false, would the demo have looked different? Yes: proven. No: only shown.*

The claim was: ☐ proven live ☐ shown, not proven ☐ not attempted

What convinced me, or didn't: _____

3 · The walk · How did it run? *Check what's true*

The slice walked end to end: ☐ yes ☐ with a gap ☐ no

☐ opened with the claim ☐ named an honest edge (something that doesn't work yet) ☐ stayed in the time box ☐ handled trouble without a restart

4 · The question I'd still ask *The one the demo left open*

Hand it to the presenter after their questions. Presenters: these go into your top-five fix list in the debrief.
