Pitch Tally Grid

One row per pitch · filled in during the selection huddle · numbers go in the weekend post

Criteria — mean, not total. Jot each sheet's score (1–3) in the cell, then write sum ÷ *n* in the box. Keep the seven separate: a 3 on value with a 1 on scope realism is the signal; a total hides it.

Would you join — count. Yes is the recruiting signal. Maybe is reported but not counted as a Yes. Comment lines aren't tallied; they go back to presenters anonymized.

***n* = sheets for that pitch** (enrollment − 1; presenters don't score themselves). Circle any criterion mean ≤ 1.5. Zero Yes → talk to that founder before they leave the room.

Blend: criterion means + Yes counts + instructor judgment → anchor ideas (teams of ~2–4) and approved solo paths. Instructor holds final say.
