CS 301R · MVP-PLAN REVIEW

MVP Plan Review

Reviewer _____

Plan reviewed _____

Read the whole plan first, then answer from the page. If you can't answer a question from what's written, that's your answer: write "the plan doesn't say." Be specific, tied to the criteria, and kind: name the line, not the vibe.

1 · Scope · Does the "in" list fit the days left before the demo? *Count it against the time, not the ambition*

What I'd cut first: _____

2 · Proof · Does the demo prove the plan's claims, or just show screens? *Walk the script against each claim*

As planned, the demo proves: ☐ the need claim ☐ the technical claim ☐ the usability claim ☐ a falsifier is stated

3 · Risk · What's most likely to go wrong in the demo itself? *Wifi, login state, an empty database, the slow step*

Fallback in the plan: ☐ seed data ☐ local mode ☐ recorded clip, declared ☐ none yet

Authors: what you'll change tonight ☐ moved to deferred: _____ ☐ script tightened ☐ fallback added

The revised plan is due end of day, and it's the version scored for CP10's *MVP plan quality*. Take a cut your reviewer named, or say in the plan why not.

Hand the sheet to the authors when your half of the talk ends. Authors keep it; it isn't turned in.
