

Team Preference Worksheet

Name _____

Think it through here, then submit it in Canvas. Rank the anchor projects you'd join — your answers are **private to the instructor**. Teams are announced at the next class, and first or second choices are honored wherever possible. **Submit by end of day today; you can edit your submission until the deadline in Canvas**, once you've read the proposals.

1 • Your ranked choices — and why, in criteria language

#	PROJECT	WHY — VALUE · RICHNESS · SCOPE · STACK · WHAT I'D BUILD THERE
1	_____	_____
2	_____	_____
3	_____	_____

"My friend is on it" is not a reason. "I want to build the data model for that" is.

2 • The solo option

I'd rather continue solo on my own project: ☐ Yes ☐ No ☐ Open to either

If yes — the scope I'd cut to for one person: _____

3 • What I'd bring to the team I join

One line. A skill, an interest, a piece of discovery you already did — something the team gains by getting you.

Submit in Canvas — **editable until the Canvas deadline**. Read the posted proposals + scores before you finalize · teams announced next class.
